

Features

- LCD panel directs operator through each step of the binding process
- Accommodates 4:1 plastic coil from 8mm to 33mm
- Secure coil crimping
- Handles paper from 4 1/4" to 14 1/2" (bound edge) 5" to 12" (unbound edge)
- Output stacker allows operator to keep working while finished documents are removed
- Binds up to 450 books an hour
- DigiCoil is designed for use with these GBC punches: MP2500Ix, Magna Punch, FusionPunch II, AP-2 Ultra, Quantum P70iX, USP 13

The DigiCoil Automatic Coil Inserter is the first production system of its kind and can reliably bind books up to 33mm thick. The DigiCoil is easy to set-up and runs a full range of coil sizes. The fast, unique 3-point drive system makes it perfect for both short and long runs, in either digital or offset shops. Change overs for different book thicknesses take less than two minutes thanks to the tool free set-up. The DigiCoil's revolutionary design handles assorted stocks, index tabs and extended covers with ease.

DigiCoil

AutoBind 500

Features

- High performance with practical binding speeds of 1300 books per hour or 1000 calendars per hour
- 20" binding width
- Easy to change wire diameters from 3/16" to 1 1/4" diameters in 3:1 and 2:1 pitches
- Touch screen control panel with error diagnostics
- Automatic horizontal paper feed and automatic closing create efficiency and optimum production rates

This is the newest generation of automatic wire comb binding systems. The versatility and high productivity of this product series addresses the needs of a wide variety of production situations. The automatic wire binding systems cut the wire to length and insert automatically with a minimum of motion. Each system is designed to assure a short set up time and the best working quality for the operator. An ergonomically designed work flow and the ability to operate the machine in a sitting position increase productivity and economy.

Features

- Production rates as high as 600 books per hour
- Available in 6 mm or 4:1 or .2475 pitch or 3:1 pitch
- Quick Setup - no tools required for basic setup & change over
- Foot Pedal actuated
- 110 V Single phase
- Compressed air required 80 psi@2 cfm
- Dimensions; 36"Wx24"H. On wheels for easy relocation

The APSI 300 Automatic Plastic Spiral Inserter accommodates pre-cut plastic spiral diameters from 6mm to 20mm. Diameters up to 30 mm are available with the optional changeover kit. Automatically inserts pre-cut lengths of spiral and simultaneously crimps both ends in a single operation. A built in spiral sizing gauge helps determine the exact coil diameter required. Vertical book placement allows for tabs or oversized covers to line up easily and bind accurately. Spiral diameter setup and changeover is quick and accurate with the QSA (quick-size adjustment) lever and does not require tools.

APSI300

Features

- Output stacker maintains job collation without a turn-over device
- Edge guide adjustment knobs allow sheet size change effortlessly without tools
- Variable speed control and adjustable pick feeder to accommodate various paper stocks
- Electronic adjustment for heavily curled stock
- CombBind, WireBind, ColorCoil, Proclick, VeloBind and Loose-leaf die sets available
- Handles paper from 5 1/2" to 12" (Punched edge) 5 1/2" to 11 3/4" (Unpunched edge)
- Feed hopper and output stacker hold 2,500 sheets of 20lb bond or equivalent
- 8 Interchangeable die sets provide punching pattern versatility (not included)

The AP-2 Ultra Automatic Punch can accommodate a wide variety of sheet sizes, punch styles and paper stock, making it the right choice for the on-demand environment. It punches intermixed index tabs and irregular sized covers with ease. Advanced paper handling technology makes feeding coated, laminated glossy and heavier stocks trouble free. The electronic control panel enables the user to set the speed for each job. Die sets can be changed quickly and without any tools.

STL 1000

Features

- Handles tabbed books with ease
- Skip binding: up to 3 times possible
- Touch screen allows user-friendly setting
- Short setup time for diameter change 5-10 min.
- No fine tuning required with Renz Ring Wire® loops
- Electric spool lift for easy loading
- No compressed air necessary
- Very low noise level
- No special training

The Mobi 500 is equipped to close 13 wire diameters in 3:1 and 2:1 pitches from 3/16" to 1 1/4" diameters. With an operator friendly touch screen control, rapid format changes are simple and easy to set. Features automatic paper format and binding station adjustment, and lifting device for quick operator friendly spool change. Practical binding output of 700-800 units per hour includes a footswitch that activates the transport to the binding station. An automatic feed calendar hanger dispenser (KA 300) or roll dispenser (KA300R) can also be added. It is mounted on wheels for easy relocation.
