

**PB2600**  
**Electric Plastic**  
**Comb Binder**

**Features**

- Electrical binding optimizes productivity and convenience, providing output of up to 300 books per hour
- Single adjustment knob with LED's that pre-set and remember the opening position for each element size
- "No-flip" Spine Stopper holds large spines in place
- Angled surface for easy loading and paper alignment
- Binds up to 425 sheets at once
- Two binding controls: a hands-free foot pedal or a push button

**This high-capacity, electric finisher can bind up to 300 presentations in an hour. Just set your spine size and get it done in three quick steps. Simply push the button or foot pedal to open, load pages and push again to close. Use it to bind oversized documents up to A4 size.**

**Features**

- Quickly bind books with ProClick easy edit elements in just 6 seconds
- LCD display walks user through the binding process
- Load cassettes of 20 ProClick spines in the Pronto
- No user training required to operate
- Document alignment light guides book creation to ensure the perfect bind
- Bind cycle of 6 seconds for binding productivity of up to 450 books per hour

**The ProClick P2000 Automated Binding Machine is designed for offices that already have a modular die punch with a Proclick Pronto die. Print shops and higher volume users can enjoy the high volume punching capabilities of their modular punch and the extremely fast binding cycle of the ProClick Pronto system. It is an incredible new product that is an easy edit punch and bind alternative to traditional binding styles. Easily add and delete pages from a ProClick bound document without special tools or machines. It offers the convenience of push button, automated ProClick binding.**

**P2000 Binder**

**16BD**  
**Comb**  
**Binder**

**Features**

- Manual binding arm lets the user control the opening position of the binding element for easy page loading
- Twenty-eight metal fingers automatically engage and open plastic comb elements for documents up to 16"
- Side control knob sets the opening position based on the binding element size. Once engaged, the binding arm will automatically stop at the correct setting, speeding up productivity
- All metal construction provides greater durability
- Binds plastic comb elements from 1/4" to 2"

**Unparalleled flexibility and style is what you get when you use the 16BD plastic comb binder. Documents stay open for reading and pages are easy to add or delete. One-step manual binding arm allows for precision opening of binding elements.**

**4470  
Modular  
Comb Opener**

**Features**

- Will bind up to 2" (51 mm) thick, 11" (A4) wide
- The opener has an adjustable ring opener control for exact book placement

Enjoy the flexibility of comb binding with this all metal comb opener module. Binds all size binding combs, and features an adjustable comb sizer to speed production. Mount on punch or use side-by-side.

**Features**

- Plastic Comb Manual Binding Machine
- Binds documents up to 425 sheets thick
- Max binding length of 13 1/2" can accommodate binding with both 19 and 24 ring plastic combs
- Use as a stand alone work station with the purchase of the modular holder
- Forms a productive punch and binding system when mounted to the DTP 340M

The PBS 340 is a manual plastic comb binder. When used with DTP 340 M, it forms a productive plastic comb punch and bind machine. Or use as a stand alone device with the purchase of the modular holder.
