

The McIntire / Image Service Advantage

The service teams at McIntire Business Products and Image Communications protect more than just your equipment. We also look after your company's productivity, performance, and profits. By combining our manufacturing expertise, factory-trained service professionals and area coverage, we're able to provide you with the perfect solution: one that's matched exactly to your equipment needs and your business goals.

By investing in the McIntire / Image Service Team solution, you'll always be protected from the adverse effects of unexpected downtime. Each Equipment Maintenance Agreement (EMA) starts by covering all parts, labor and travel expenses associated with costly repairs.

Without protection, the cost to replace one key component could easily exceed one year of complete coverage.

McIntire / Image Equipment Maintenance Agreement Benefits:

- **Unlimited Service Calls:** We service equipment correctly the first time. If we don't, it costs us, not you.
- **Defy Inflation:** One reasonable payment covers you for a year. Your budget is fixed no matter how parts, labor or gas prices may climb.
- **Decrease Downtime:** Our service professionals employ factory-approved tools and techniques. Our experienced technician will come to your location and do the work on site, ensuring you receive complete service.
- **Parts Are On Us:** Replacing just one key component could easily cost more than the entire agreement. Once you are protected by the McIntire / Image Equipment Maintenance Agreement there is no charge.
- **New-Operator Training:** Proper training is essential to increase quality and productivity and reduce waste.
- **Labor and Travel Time Are On Us:** No matter how far we travel or how much work we put in, you are covered.
